Banaquiri

You can use this recipe to make any kind of fruit daiquiri. Just substitute 2 ounces (about 1/2 cup) of fruit (such as melon, peaches, strawberries, apricots, litchis, kiwi or mango) for the banana. If you like, you can also replace the maraschino with a complementary liqueur or brandy (Midori with melon, peach brandy with peaches, etc.). Garnish with the mint sprig and a piece of whatever fruit went into the mix, skewered on a cocktail pick.

Serving: 1

INGREDIENTS:

- 1 1/2 ounces silver rum
- 1/2 large banana (about 4 ounces)
- 1/2 ounce lime juice
- 1 teaspoon simple syrup
- 1/2 ounce maraschino liqueur
- 1 cup crushed ice
- 1 sprig mint, for garnish
- 1 slice banana, on a cocktail pick for garnish
- Old-fashioned or large cocktail glass

DIRECTIONS:

Blend the rum, banana, lime juice, syrup, maraschino liqueur and ice in an electric blender until smooth, about 15 seconds. Pour into the glass and garnish with the mint sprigs and skewered banana slice.
